REPORT OF ANALYSIS

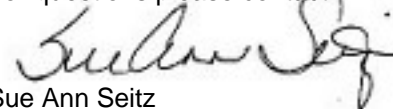

For: (30913) NEW PLANET BEER COMPANY
GLUTEN ANALYSIS

Detailed Method Description(s)

Allergens

Samples are analyzed following MWL FO 064 and employs the use of ELISA (Enzyme Linked Immunosorbent Assay). Depending on the type of allergen, samples are extracted and the extract placed in a series of wells coated with specific antibodies. These antibodies capture the allergen (antigen) and a complex is formed. A second antibody containing an enzyme is then used to coat the fixed antigen-antibody complex and the enzyme acts on a substrate that is acted on by the enzyme and produces a product that is measured.

The result(s) issued on this report only reflect the analysis of the sample(s) submitted.
